

# ReproActive Bairnsdale

## Weaner Management - Planning for Performance

Weaning is one of the most crucial management interventions in a beef operation, regardless of season.

Herd Solutions, Australian Livestock Production Services, Agriculture Victoria & Zoetis invite you to this informative & practical workshop. Developed by Australia's leading vets, cattle specialists & rural business experts, ReproActive is an outstanding specialised workshop series designed to help maximise the reproductive & productive potential of beef herds.

### *What's in Store?*

- Dr Paul Cusack, ALPS: Feeding weaners – meeting the needs of growing stock & the ramifications of getting it wrong + BRD in young cattle – Why it is important & how it can be managed
- Dr Alison Gunn, Herd Solutions: Implementing & managing early weaning to drive efficiency & production on farm & in the feedlot + Laying the foundations for lifelong heifer productivity using Critical Mating Weights

*Practical sessions reinforcing speaker topics also included*

***Drought relief funding from Agriculture Victoria has enabled this event to be run free of charge for producers in conjunction with the Better Beef Network.***
