

Legend:

-  Existing vegetation
-  Bitumen paving
-  Gravel paving
-  Footpath paving
-  Grassed swale
-  Picnic table
-  Bollards

- 1 New bitumen road alignment**
This alignment is suggested closer to the toilets avoiding existing trees. This new alignment frees up the foreshore for safe pedestrian use.
- 2 New carparking spaces**
90 degree parking is proposed to either side of the new road contained by wheel stops and bollards.
- 3 Branch access for boat ramp**
A small sealed branch road formalises the boat ramp access with limited parking to either side.
- 4 Foreshore open space**
The small beach and access to jetties is to be landscaped with paths, lawn and vegetation.
- 5 Roadside parallel parking**
Parallel parking is provided for trailers and larger vehicles.

Note:

This concept has been prepared with very limited site information. The concept should be developed after full feature survey and assessment of these areas.
